Subject: RE: East Northants Resource Management Facility

Hi [redacted],

I would like to confirm that there is no pre app fee from the LHA.

The LHA would look for the following when reviewing a transport statement:

Routes in which the traffic to the site is used.
Width of the roads that could cause concern if exacerbated.
What the current access is like and if this would need improvements.
Will the staff numbers increase? Will there be additional parking to help with this?
Sustainable links .
Bus stops in the area for workers who may not drive.

The LHA does not accept traffic counts undertaken within the following periods:

- Months January and December
- During school holidays or one week either side of those dates.

And of course at current with the Covid-19 issue that we are facing.

I do hope this helps and if you need any more information please let me know.

Regards,
[redacted]

[redacted]

Thanks for getting back to me. At the moment information is limited as the proposals are still being worked through but it is essentially an extension of Augean's waste disposal site to the north of Kings Cliffe to extend the site's life with tonnages, and therefore traffic movements, to be maintained at current pre-lockdown levels. I've attached a preliminary plan showing the site's current area of activities and the proposed extension area. I must stress that this is a very preliminary plan and may change as the proposals are refined.

I would like to confirm with you is there a pre-app fee as I would like to start discussions with you on the scope of the transport statement that will be required to support the application so that I can start making arrangements for traffic counts for when flows are normalised.

At present all HGV traffic for the site comes from/goes to the A47 to the north of the site.

Regards
[redacted]

Hi [redacted]

Do you have any information that you are able to send over to myself so that I can take a look at this?

Regards,
